11 5 Solving Rational Equations

In this section we will discuss how to solve trig equations. The answers to the equations in this section will all be one of the "standard" angles that most students have memorized after a trig class. However, the process used here can be used for any answer regardless of it being one of the standard angles or not.

Calculus I - Solving Trig Equations

Here is a set of practice problems to accompany the Solving Exponential Equations section of the Exponential and Logarithm Functions chapter of the notes for Paul Dawkins Algebra course at Lamar University.

Algebra - Solving Exponential Equations (Practice Problems)

CCSS.Math.Content.HSA.REI.D.11 Explain why the x-coordinates of the points where the graphs of the equations $y = f(x)$ and $y = g(x)$ intersect are the solutions of the equation $f(x) = g(x)$; find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational ...

High School: Algebra » Reasoning with Equations ...

Work problems often ask us to calculate how long it will take different people working at different speeds to finish a task. The algebraic models of such situations often involve rational equations derived from the work formula, $W = rt$. The amount of work done (W) is the product of the rate of work (r) and the time spent working (t). The work formula has 3 versions:

How to Graph Linear Equations. Are you stuck not knowing how to draw a linear equation without using a calculator? Luckily, drawing a graph of a linear equation is pretty simple! All you need to know is a couple things about your equation...

How to Graph Linear Equations: 5 Steps (with Pictures ...

Solving Equations Containing Fractions and Decimals page 2.3- The Multiplication Property of Equality We may multiply any non-zero number, c , to each side of an equation. If $a = b$, then $c \cdot a = c \cdot b$, $c \neq 0$ Applying the Multiplication Property of Equality to an equation such as

2.3 Solving Equations Containing Fractions and Decimals

Algebra 1 Test Practice. Welcome to McDougal Littell's Test Practice site. This site offers multiple interactive quizzes and tests to improve your test-taking skills.

Algebra 1 Test Practice - ClassZone

A polynomial equation, also called algebraic equation, is an equation of the form $ax^n + \dots + bx + c = 0$. For example, $x^2 - 5x + 6 = 0$ is a polynomial equation. When considering equations, the indeterminates (variables) of polynomials are also called unknowns, and the solutions are the possible values of the unknowns for which the equality is true (in general more than one solution may exist).

Polynomial - Wikipedia

In mathematics, a system of linear equations (or linear system) is a collection of two or more linear equations involving the same set of variables. For example, $x + y = 5$, $x - y = 3$ is a system of

three equations in the three variables x , y , z . A solution to a linear system is an assignment of values to the variables such that all the equations are simultaneously satisfied.
