Beef production is immensely wasteful in terms of energy, massive environmental degradation, and diverting good land and crops away from feeding people to feeding cattle. It is a massive sector, primarily to produce for unhealthy consumption, yet takes up so much of the world's resources. It used to be a luxury item but now is consumed regularly.

Initial empiric antibiotic therapy. The choice of initial empiric antibiotic therapy for the febrile, neutropenic patient should be broad spectrum and is dictated in part by the susceptibility pattern of blood isolates seen at a particular cancer center ( ). If the prevalence of extended-spectrum beta-lactamase (ESBL) gram-negative bacteria is high, for example, one probably would not want to ...

INTRODUCTION. The appropriate selection of empiric antibiotic therapy for positive blood cultures is a complex and difficult decision. Bacteria are only partially identified on Gram stain and speciation and susceptibility results will take an additional 24-48 hours after a culture is reported as positive. While patients with positive blood cultures may be bacteremic signifying a true ...

Pneumonia can be generally defined as an infection of the lung parenchyma, in which consolidation of the affected part and a filling of the alveolar air spaces with exudate, inflammatory cells, and fibrin is characteristic. Infection by bacteria or viruses is the most common cause, although infection by other micro-organisms such as rickettsi...

#### Summary points Autoimmune hepatitis, primary biliary cirrhosis, and sclerosing cholangitis represent perhaps 5% of all liver diseases, although no registries exist to estimate the true prevalence. They are presumed autoimmune conditions, usually considered as a diagnosis after viral, metabolic, and drug induced liver injuries have been excluded.

Fluorine is a chemical element with symbol F and atomic number 9. It is the lightest halogen and exists as a highly toxic pale yellow diatomic gas at standard conditions. As the most electronegative element, it is extremely reactive, as it reacts with almost all other elements, except for helium and neon. Among the elements, fluorine ranks 24th in universal abundance and 13th in terrestrial ...
