

Basic Tissue Study Guide

Basic Tissue Study Guide

Fibroblasts are the most common resident cells in ordinary connective tissue. Fibroblasts are responsible for secreting collagen and other elements of the extracellular matrix of connective tissue. In microscopic appearance, fibroblasts lack obvious specialized features. And fibroblasts throughout the body all appear similar to one another, wherever they occur in ordinary connective tissues.

Connective Tissue Study Guide - siumed.edu

There are three types of specialized fibrous tissue in our body which serve a specific purpose. The first is ligaments. Ligaments are fibrous tissues that connect bones to other bones.

Epithelium Study Guide. Epithelial tissue comprises one of the four basic tissue types. The others are connective tissue (support cells, immune cells, blood cells), muscle tissue (contractile cells), and nervous tissue. Organs represent various combinations of these four basic tissue types, which thus comprise the entire body.

Epithelium Study Guide - siumed.edu

These numbers will likely increase in the years ahead, with the Bureau of Labor Statistics reporting that the industry is expected to grow by 26 percent between 2016 and 2026, an amount that is "much faster than the average for all occupations." While there are numerous types of massage available—Swedish, aromatherapy, hot stone, and more—each one requires a different technique and ...
