While everyone agrees that color coding is very important, keeping up with it can be a pain in native Excel. It's not easy to format cells based on whether they are inputs or formulas, but it can be done. One option is to use Excel's "Go To Special" (covered in our Excel Crash Course, which you can enroll in here). Alternatively, color coding is dramatically simplified with a third party Excel ...

Internal Rate of Return IRR is a financial metric for cash flow analysis, often used for evaluating investments, capital acquisitions, project proposals, and business case scenarios. By definition, IRR compares returns to costs by finding an interest rate that yields zero NPV for the investment cash flow stream. However, finding practical guidance for Investors and decision makers in IRR ...

### **2013 - Complete database**

A database is an organized collection of data, generally stored and accessed electronically from a computer system. Where databases are more complex they are often developed using formal design and modeling techniques. The database management system (DBMS) is the software that interacts with end users, applications, and the database itself to capture and analyze the data.
