Stencil Examples. Probably the most typical use of the stencil test is to mask out an irregularly shaped region of the screen to prevent drawing from occurring within it (as in the windshield example in "Buffers and Their Uses"). To do this, fill the stencil mask with zeros, and then draw the desired shape in the stencil buffer with 1's.

GPB's Georgia Studies digital collection brings an innovative, interactive experience to telling the story of Georgia's history, culture, and geography.

Georgia Studies | Georgia Public Broadcasting

From their very first day in school, students should be actively engaged in learning to view the world scientifically. That means encouraging them to ask questions about nature and to seek answers, collect things, count and measure things, make qualitative observations, organize collections and observations, discuss findings, etc. Getting into the spirit of science and liking science are what ...

Chapter 1 ~ Benchmarks Online ~ Project 2061 ~ AAAS

History. Behavior-driven development is an extension of test-driven development: development that makes use of a simple, domain-specific scripting language. These DSLs convert structured natural language statements into executable tests. The result is a closer relationship to acceptance criteria for a given function and the tests used to validate that functionality.
