Self-help or self-improvement is a self-guided improvement —economically, intellectually, or emotionally—often with a substantial psychological basis. Many different self-help group programs exist, each with its own focus, techniques, associated beliefs, proponents and in some cases, leaders. Concepts and terms originating in self-help culture and Twelve-Step culture, such as recovery ...

1. Introduction. School education in the twenty-first century is expected to equip students with both domain knowledge and the twenty-first century skills in order to meet the requirements of a vigorously changing society (Chan, 2010, Gut, 2011). Information literacy and critical thinking skills are two important parts of the twenty-first century skills (Gut, 2011, Kang et al., 2010).
