

Computer Networks 5th Edition Solutions

Computer Networks 5th Edition Solutions

A computer network is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as Wi-Fi. Network computer devices that originate, route and terminate the data are called ...

A backbone is a part of computer network that interconnects various pieces of network, providing a path for the exchange of information between different LANs or subnetworks. A backbone can tie together diverse networks in the same building, in different buildings in a campus environment, or over wide areas. Normally, the backbone's capacity is greater than the networks connected to it.

Backbone network - Wikipedia

Jack Wang, CCIE #32450, is a Network Solution Architect, Author, Technical Writer and Consultant at Speak Network Solutions. He has been designing and implementing enterprise and large scale service provider networks as well as teaching and blogging about advanced technologies.
