

Document Management System Data Flow Diagram Dfd

Document Management System Data Flow

A document management system (DMS) is a system (based on computer programs in the case of the management of digital documents) used to track, manage and store documents and reduce paper. Most are capable of keeping a record of the various versions created and modified by different users (history tracking). The term has some overlap with the concepts of content management systems.

Document management system - Wikipedia

Document management is the process of handling documents in such a way that information can be created, shared, organized and stored efficiently and appropriately. As such, learning how to create a document management system is critical for businesses.
