Many forest management policies have been implemented that impact forest product economics, including forest access restrictions, harvesting fees, and harvest limits. Deforestation, global warming and other environmental concerns have increasingly affected the availability and sustainability of forest products, as well as the economies of regions dependent upon forestry around the world.

1. Introduction. Tropical deforestation is one of the most important threats to biodiversity and ecosystems worldwide (Geist and Lambin, 2002; Cazzolla Gatti et al., 2015). In Southeast Asia, large forest areas are managed through selective logging and clearcutting for valuable wood, paper, and

pulp (Miettinen et al., 2012). More recently, the globalization of the palm oil trade poses a new ...

Scope. Frontiers in Forests and Global Change publishes rigorously peer-reviewed research across the field of forest science - spanning from molecules to ecosystems to the biosphere, to inform and promote the sustainable management of the world's forests.. [Read More](#)

### **Frontiers in Forests and Global Change**

1. Introduction. Forest ecosystems store more than 80% of all terrestrial aboveground C and more than 70% of all soil organic C (Batjes, 1996, Jobbágy and Jackson, 2000, Six et al., 2002a). The annual CO<sub>2</sub> exchange between forests and the atmosphere via photosynthesis and respiration is  $\approx 50 \text{ Pg C/yr}$ , i.e. 7 times the anthropogenic C emission. An increase in soil respiration would increase ...
