

Gender Policy And Hiv In China Catalyzing Policy Change

Gender Policy And Hiv In

HIV is not only driven by gender inequality, but it also entrenches gender inequality, leaving women more vulnerable to its impact.⁴ The gender inequalities in some regions result in an even starker difference between the way HIV affects men and women.

Gender inequality and HIV | AVERT

Under the guidance and supervision of the Policy Advisor, Gender equality, HIV, and Health, the Policy Specialist is responsible for contributing to the effective development and implementation of UN Women's efforts to address the gender equality dimensions of HIV and AIDS in order to end AIDS and achieve gender equality and advancement of women.

UN Women: Policy Specialist, Gender Equality and HIV/AIDS

HIV/AIDS and its overwhelming effects. This is evidenced by the disproportionate impact of the epidemic on women, especially in Sub-Saharan Africa, where the "feminization" of AIDS is most visible. In this region, for every HIV-positive young man (15-24 years) there are three HIV-positive young women.

HIV/AIDS AND GENDER ISSUES - Interagency Coalition on AIDS ...

Understanding gender norms and gender inequality is essential to reducing HIV risk among men, women, and transgender persons. Although there are similarities in HIV risk factors and behaviors across genders, differences exist and some gender groups are far more affected than others.
