Elektrokemija jedna je od grana kemije.Svrstava se pod fizikalnu kemiju.. Proučava kemijske reakcije koje se događaju između električnog vodiča (metalne, poluprovodničke ili grafitne elektrode) i ionskog vodiča (elektrolita) prilikom kojih dolazi do prijenosa elektrona između elektrode i elektrolita.. Ako je neka kemijska reakcija izazvana vanjskim naponom, kao u slučaju elektrolize ...

Elektrokemija - Wikipedija

Se denomina plasma a un fluido gaseoso de iones. Incluso, se puede hablar de plasma en muestras de gas corriente que contengan una proporción apreciable de partículas cargadas. Se puede considerar a un plasma como un nuevo estado de la materia, (aparte de los estados sólido, líquido y gaseoso), concretamente el cuarto estado de la materia, puesto que sus propiedades son muy distintas a los ...
