In this paper we revisit the relationship between democracy, redistribution, and inequality. We first explain the theoretical reasons why democracy is expected to increase redistribution and reduce inequality, and why this expectation may fail to be realized when democracy is captured by the richer segments of the population; when it caters to the preferences of the middle class; or when it ...

Democracy, Redistribution, and Inequality - ScienceDirect

Our 'minds', 'souls', 'spirit' and consciousness are all physical in nature 1.Thousands of years of investigation has shown us that our brains comprise and produce our true selves, although because

that for most of human history we have had no understanding of how our brains work most Humans have falsely believed inferred that we have souls 2 and this idea has infused our folklore, cultures ...

The history of biology traces the study of the living world from ancient to modern times. Although the concept of biology as a single coherent field arose in the 19th century, the biological sciences emerged from traditions of medicine and natural history reaching back to ayurveda, ancient Egyptian medicine and the works of Aristotle and Galen in the ancient Greco-Roman world.

Alfred Lothar Wegener (1 November 1880 – 13 November 1930) was a German scientist and meteorologist. He is most notable for his theory of continental drift, which he proposed in 1912. This was the idea that the continents were slowly drifting around the Earth.He also had ideas about why the continents drift, which other scientists thought were impossible.
