How do you properly link a JavaScript file to a HTML document? Secondly, how do you use jQuery within a JavaScript file?

### **jquery - How do I link a JavaScript file to a HTML file ...**

Have you ever taken a look on CodeAvengers.com. I stopped learning JS on codecademy after realizing I was making little improvement. I learned Java back in college, so I had little experience with coding and most syntax used in programming languages (that's not to say the two are similar but some thought process is common in different languages).

### **How to Learn JavaScript Properly | JavaScript Is Sexy**

Try this code. By using the parent>child selector "#productList li" it should find all li elements. Then, you can iterate through the result object using the each() method which will only alter li elements that have been found.

### **javascript - Looping through list items with jquery ...**

Exercises. We have gathered a variety of jQuery exercises (with answers) for each jQuery Chapter. Try to solve an exercise by filling in the missing parts of a code.

### **jQuery Exercises - w3schools.com**
