Graphic Organizers: Each Lesson Plan in Part 3 (Readers) of the Instructor's Guide has a graphic-organizer activity. Teachers can download the graphic organizer used for that lesson activity and make copies for each student. MP3 Recordings: All of the articles in the Intermediate 2 Reader have been recorded. The recordings provide modeled fluency and read-along support, helping connect the ...

Manufacturing execution systems (MES) are computerized systems used in manufacturing, to track and document the transformation of raw materials to finished goods. MES provides information that helps manufacturing decision makers understand how current conditions on the plant floor can be optimized to improve production output. MES works in real time to enable the control of multiple elements of ...

Routing is the process of selecting a path for traffic in a network or between or across multiple networks. Broadly, routing is performed in many types of networks, including circuit-switched networks, such as the public switched telephone network (PSTN), and computer networks, such as the Internet.. In packet switching networks, routing is the higher-level decision making that directs network ...
