Activity diagrams are graphical representations of workflows of stepwise activities and actions with support for choice, iteration and concurrency. In the Unified Modeling Language, activity diagrams are intended to model both computational and organizational processes (i.e., workflows), as well as the data flows intersecting with the related activities.

The cycle of kaizen activity can be defined as: "Plan → Do → Check → Act". This is also known as the Shewhart cycle, Deming cycle, or PDCA.. Another technique used in conjunction with PDCA is the 5 Whys, which is a form of root cause analysis in which the user asks a series of five "why" questions about a failure that has occurred, basing each subsequent question on the answer to the ...

However, because your heart rhythm can change, an electrocardiogram by itself may not detect an abnormal heart rhythm. Your doctor may give you certain medications — including some types of anti-anginals, antidepressants, antipsychotics or antihistamines — that can unmask the type 1 Brugada ECG pattern in people who have Brugada syndrome.
