Preparation of hydrogel based on acrylamide, acrylic acid, and its salts by inverse-suspension polymerization and diluted solution polymerization have been investigated elsewhere. Fewer studies have been done on highly concentrated solution polymerization of acrylic monomers, which are mostly patented. Chen produced acrylic acid-sodium acrylate superabsorbent through concentrated (43.6 wt ...

Controllability is an important property of a control system, and the controllability property plays a crucial role in many control problems, such as stabilization of unstable systems by feedback, or optimal control.. Controllability and observability are dual aspects of the same problem.. Roughly, the concept of controllability denotes the ability to move a system around in its entire ...
