@DAC. In short: SID = the unique name of your DB, ServiceName = the alias used when connecting. Not strictly true.. SID = unique name of the INSTANCE (eg the oracle process running on the machine).

How SID is different from Service name in Oracle tnsnames.ora

In Oracle SQL Developer, if I'm viewing the information on a table, I can view the constraints, which let me see the foreign keys (and thus which tables are referenced by this table), and I can view the dependencies to see what packages and such reference the table. But I'm not sure how to find which tables reference the table. For example, say I'm looking at the emp table.
