A round, cylindrical box. The template consists of 4 parts and comes with a paper jig that can be used to assemble the box in a neat way. The top and bottom parts are duplicated in the template. When they are cut out you are left with the jig plus 2 tops and 2 bottoms. You can destroy the spare top and bottom.

I used aluminum flashing as it's sturdy but can be cut out with scissors. If you used label stock, just attach the label to the substrate. If you use plain paper, use spray adhesive to attach the label. Cover the whole front surface of the template with clear tape (2" packing tape for instance). Then cut out the template.

A cylinder is a geometric surface formed by the points at a fixed distance from a given straight line, forming what's called the axis of a cylinder. The solid surface of the two bases joined by the height that's formed by two perpendicular lines to the axis, is also called a cylinder. Below, we'll show you step-by-step, how to make a cylinder out of cardboard.

To make a funnel or cone from paper, start by tracing a wide triangle onto a sheet of paper. Make

sure the two shorter sides are the exact same length, then cut the triangle out. Next, take one of the far corners and roll it into the center so the paper's edge is touching the middle of the triangle.

These templates can be downloaded in excel or word format, after which you can print them, cut them out, and teach your kids exactly how a cube works. Once you have the design that you need, all you have to do is cut them out. It is a good idea to laminate the cubes after you make the cut outs, to make them as durable as possible.
