Earth Science - Chapter 2 Minerals - Section 2.3 Properties of Minerals. Every mineral has a crystal form based on one of six distinct crystal systems. Usually, when a mineral forms slowly and without space restrictions, it will develop into a crystal with well formed faces. Most of the time, however, minerals compete for space, resulting in an intergrown mass of small crystals.

Earth Science - Chapter 2 Minerals - Section 2.3 ...

2 Properties of Minerals. Background. Minerals can be identified by their color, luster, streak, cleavage, hardness, and even by their chemical composition. Using these properties is one way a Geologist defines and identifies what kind of mineral a specimen is.

Properties of Minerals - Natural History Museum of Los ...
