Section 3 Reinforcement Energy For

Main section: Reinforcement#Operant conditioning In the behavioral sciences, the terms "positive" and "negative" refer when used in their strict technical sense to the nature of the action performed by the conditioner rather than to the responding operant's evaluation of that action and its consequence(s).

Reinforcement - Wikipedia

A sound reinforcement system is the combination of microphones, signal processors, amplifiers, and loudspeakers in enclosures all controlled by a mixing console that makes live or pre-recorded sounds louder and may also distribute those sounds to a larger or more distant audience. In many situations, a sound reinforcement system is also used to enhance or alter the sound of the sources on the ...

First, in general, reinforcement learning turned out to be a lot trickier than expected. A big part of it is that right now, reinforcement learning is really sensitive. There are a lot of details to get just right, and if you don't get them right, it can be difficult to diagnose where you've gone wrong..

Example 1: after finishing the basic implementation, training runs just weren't ...
