These interactive labeling exercises will help you learn the parts of the human anatomy.

EMTB9e: Anatomy Review

Rating Note (1): Evaluate cor pulmonale, which is a form of secondary heart disease, as part of the pulmonary condition that causes it. Note (2): One MET (metabolic equivalent) is the energy cost of standing quietly at rest and represents an oxygen uptake of 3.5 milliliters per kilogram of body weight per minute. When the level of METs at which dyspnea, fatigue, angina, dizziness, or syncope ...

38 CFR § 4.104 - Schedule of ratings - cardiovascular system.

10 Metabolic and Cardiovascular Disorders. Chapter Overview. Based on new evidence and a review of prior studies, the current committee found that new scientific evidence combined with previously reviewed studies has led to changes in the categorizations of association for two metabolic and cardiovascular outcomes outcomes: type 2 diabetes and hypertension.

3.66. Heart and circulatory disease, also known as cardiovascular disease (CVD), causes a quarter of all deaths in the UK [115] and is the largest cause of premature mortality in deprived areas. This is the single biggest area where the NHS can save lives over the next 10 years. CVD is largely prev

NHS Long Term Plan » Cardiovascular disease

This chapter is relevant to Section G7(iii) of the 2017 CICM Primary Syllabus, which asks the exam candidate to "describe the invasive and non-invasive measurement of blood pressure, including limitations and potential sources of error". It deals with the reasons for why the arterial pressure waveform is the shape that it is. Generally, this topic has not been a prominent feature of the CICM ...

Robert L Stamper MD, ... Michael V Drake MD, in Becker-Shaffer's Diagnosis and Therapy of the Glaucomas (Eighth Edition), 2009. Norepinephrine is the neurotransmitter at most sympathetic neuroeffector junctions. Norepinephrine is stored in synaptic vesicles in the cytoplasm of axon terminals, is released in response to nerve impulses, and diffuses across the junction to the effector organ.

Norepinephrine - an overview | ScienceDirect Topics

Think about it - O"I was about 47 when I collapsed one day at work. There are 22 minutes of my life that I don't remember. I had gone into cardiac arrest." Fortunately he received prompt treatment and had successful heart surgery.

Chapter 33

AVAILABLE FOR ORDER — DVD-ROM. Identify bacteria, examine heart patients, probe the nervous system, assay antibodies, study circadian rhythms, and analyze evolution in action.

Bone, or osseous tissue, is a hard, dense connective tissue that forms most of the adult skeleton, the support structure of the body. In the areas of the skeleton where bones move (for example, the ribcage and joints), cartilage, a semi-rigid form of connective tissue, provides flexibility and smooth surfaces for movement.
