Typical Monitor Resolution

A computer monitor is an output device that displays information in pictorial form. A monitor usually comprises the display device, circuitry, casing, and power supply. The display device in modern monitors is typically a thin film transistor liquid crystal display (TFT-LCD) with LED backlighting having replaced cold-cathode fluorescent lamp (CCFL) backlighting.

Computer monitor - Wikipedia

When you change the screen resolution, it affects all users who log on to the computer. When you set your monitor to a screen resolution that it can't support, the screen will go black for a few seconds while the monitor reverts back to the original resolution.

Change your screen resolution - Windows Help

More room to work: With a thin profile and monitor base that's approximately 22% smaller than its predecessor*, you can free up valuable desk space. Expand your efficiency: The three-sided ultrathin bezel design lets you enjoy an uninterrupted view of your content across multiple monitors. And, with dual monitors, you can increase your productivity by up to 18%*.

Galaxy Note9 OLED Display Technology Shoot-Out

The graphics display resolution is the width and height dimension of an electronic visual display device, such as a computer monitor, in pixels. Certain combinations of width and height are standardized and typically given a name and an initialism that is descriptive of its dimensions. A higher display resolution in a display of the same size means that displayed photo or video content appears ...

Anatomy of a Monitor - monitorinsider.com

How an image is rendered on a progressive display vs. an interlaced display. As people moved away from the older CRT displays, the terminology changed from refresh rate to frame rate, because of the difference in the way the LED monitor works. The frame rate is the speed with which the monitor displays each separate frame of data. The most recent versions of Windows set the framerate at 60 ...

Thanks for a VERY useful site, Carlton, which I have used several times since HD TV sets came out some years back. Just replaced a 5 year old 50" plasma set (that developed a horizontal line) with another 51" plasma set, 720p, (\$399), same brand (it was easy to put all the connections in the same places and not have to use a different remote).
