A barn (symbol: b) is a unit of area equal to 10^{-28} m^2 (or 100 fm^2). Originally used in nuclear physics for expressing the cross sectional area of nuclei and nuclear reactions, today it is also used in all fields of high-energy physics to express the cross sections of any scattering process, and is best understood as a measure of the probability of interaction between small particles.

Weaving Glossary ~ Personalized A is for Advance the Warp. Advance the Warp Move the warp forward by releasing the pawl on the ratchet on the back beam and winding it forward with the ratchet on the cloth beam. It seems counterintuitive to stop weaving and advance the warp every few inches, rather than weave as far as possible before advancing; however, I have found that my cloth has more ...
